OF ELECTRONICS FOR FISHERMEN

## CATALOGUE 2025

30  
YEARS  
TOGETHER

[ORDER CODE: Q10 TX]

DIMENSIONS (H x W x D):  
60 x 107 x 30 mm

FORK WIDTH:  
19 mm

SCREW LENGTH:  
23 mm

POWER SUPPLY:  
3V (2x AAA batteries)

NEW  
GENERATION

FLAJZAR®

NEW GENERATION MULTICOLOR FISH BITE ALARM

# FISHTRON Q10 TX

The new fish bite alarm Q10 TX, which impresses with its completely new design, brings convenient control combined with anti-theft security features. The possibility of setting extreme sensitivity and two-way communication between the bite alarm Q10 TX and a receiver RX MAX accept the advanced requirements that are placed on these products.

// Multifunctional optical signalling consisting of a series of LEDs indicates the line unwinding direction and bite memory

// Night position light

// Simple adjustment of the LED column brightness

// Option to turn off the LEDs (Incognito function)

// Fast and precise transmission of a bite information to the receiver

// Q10 TX communicates with RX MAX, RX MULTI and RX MINI receivers, WRL 1, WRL3 and WRL4 lamps and HL346P headlamp (some functions are incompatible with older types of receivers)

// Sound signalisation with smooth regu-

lation and a wide spectrum of new tones

// Extremely fine sensitivity adjustment from 1 mm to 15 cm

// MUTE function (switches off sound and transmission for 1 minute)

// 2x connector for connecting a swinger

// Very long battery life

// Waterproof

// Battery life signalization

// IR barrier function to secure rods against theft

// Safety lock

// Option to purchase in a set with a bag

[ORDER CODE: RX MAX]

DIMENSIONS (H x W x D):  
56 x 101 x 28 mm

CONNECTABLE DEVICES:  
8 alarms, alarm sensors

RANGE UP TO:  
950 m

POWER SUPPLY:  
3V (2x AAA batteries)

NEW  
GENERATION

FLAJZAR®

NEW GENERATION RECEIVER

# FISHTRON RX MAX

The new RX MAX receiver is the next generation receiver. Bold design, easy operation and long battery life. Receive up to 8 of our devices and the revolutionary battery check function on the Q10 TX bite alarms, optional range check function, the ability to remotely turn off and on the sound on the Q10 TX bite alarms and last but not least the ability to view the history of up to 10 bites that have been recorded.

// Attractive design that fits very well in the hand

// Reliable reception and display of up to eight of our Q10 TX, Q9-RGB TX, e3 TX, CATFISH TX3, ALF3 and ALF4 devices (some features are not compatible with older types of receivers and alarms)

// Sound indication adjustable in four steps

// Optical line unwinding indication with direction of bite resolution

// Last 10 bites history display function

// Built-in LED flashlight with the ability to turn the flashlight on and off and adjustable bite light function

// Intelligent battery status indication on both the receiver and Q10 TX - provides visual and audible advance notification of the need to change the battery

// Ability to control the WRL1 and WRL3 wireless lamps from a long distance

// Range control function of paired Q10 TX alarms

// Ability to turn vibration on and off

// Range up to 950 m in open space

// Battery life up to 400 h NONSTOP (depending on volume setting, vibration count and features enabled)

**[ORDER CODE: Q9-RGB TX]**

**DIMENSIONS (H x W x D):**  
50 x 86 x 31 mm

**FORK WIDTH:**  
18 mm

**SCREW LENGTH:**  
20 mm

**POWER SUPPLY:**  
2 x 1,5V (2 x LR01 batteries)

We also offer the option to purchase the Q9-RGB without transmitter (Order Code: Q9-RGB)

**FLAJZAR®**

MULTI-COLOUR BITE ALARM WITHOUT COMPROMISE

# FISHTRON Q9-RGB TX

The modern FISHTRON Q9-RGB TX has many indispensable functions and offers you the possibility to set it up according to your needs.

This alarm features a redesigned communication protocol for faster and more accurate transmission of bite information to receivers.

// Multifunctional optical signalling with up to 6 colour settings

// Easy adjustment of LED column brightness

// Possibility to switch off the LEDs (Incognito function)

// Fast and accurate transmission of bite information to the receiver

// The alarm works with RX MULTI, RX MINI receivers, WRL1, WRL3, WRL4 lamps and HL346P headlamp (some functions are incompatible with older receivers)

// Acoustic signalling with a wide range of tones

// Intuitive control of sensitivity, tone and volume via pins

// Extremely fine sensitivity adjustment from 4 mm to 15 cm

// MUTE function

// Connector for swinger

// Very long battery life

// Waterproof

// Pad for strengthening the body of the alarm

// Battery status indication

// Safety lock

// Option to purchase a set with a case

[ORDER CODE: RX MULTI]

DIMENSIONS (H x W x D):  
50 X 86 X 31 mm

CONNECTABLE DEVICES:  
4 alarms, 3 alarm sensors (lamps)

RANGE UP TO:  
750m

POWER SUPPLY:  
1.5V (1x AAA batteries)

FLAJZAR®

RECEIVER WITH ENDLESS POSSIBILITIES

# FISHTRON RX MULTI

A receiver designed to capture up to 4 of our bite alarms and three motion sensors.

It not only recognizes bite, speed and direction of the line unwinding, but also the LED colour on the alarms. FISHTRON RX MULTI signals each connected device visually, by vibration and acoustically. There is a function button to control our wireless LED lamps.

// Attractive design that fits well in hand

// You can wear it around your neck or stand it on a table just as well

// Reliable reception and display of up to four alarms Q10 TX, Q9-RGB TX, e3 TX and CATFISH TX3

// Up to three wireless ALF3 and ALF4 alarm sensors can be connected

// Built-in LED flashlight

// Power supply with only one AAA cell

// Intelligent battery status signalling informs optically and

acoustically in advance of the need for replacement

// Ability to control the WRL1, WRL3 and WRL4 wireless lamps from a long distance

// Ability to switch vibration on and off

// Range up to 750m in open space

// Battery life up to 10 days NONSTOP

// Alarm lock when the alarms are off and on

// Adjustable alarm volume from ALF3 and ALF4

FOR THE DEMANDING

[ORDER CODE: e3TX]

DIMENSIONS (H x W x D):  
49 X 104 X 38 mm

FORK WIDTH:  
18 mm

SCREW LENGTH:  
20 mm

POWER SUPPLY:  
2x1,5V (2x LR01 batteries)

We also offer the option to  
purchase the FISHTRON e3 without  
transmitter (Order code: e3)

FLAJZAR®

SMALL AND SIMPLE BITE ALARM FOR EVERYONE

# FISHTRON

## E3TX

A classic that never disappoints. This is FISHTRON e3TX. It is designed for those who are looking for tradition, simplicity and reliability.

It offers simple multifunctional control - in short, no unnecessary functions or complicated settings.

- // Volume control
- // Tone control
- // Multifunctional optical signalling consisting of a series of multi-coloured LEDs, bite memory
- // Colour combinations - 4 colours (blue, green, red, purple)
- // Without line unwinding indication
- // Adjustable coating sensitivity 1 cm
- // The alarm works with RX MAX, RX MULTI, RX MINI receivers, WRL 1, WRL3, WRL4 lamps and HL346P headlamp
- // Output connector for swinger
- // Option to purchase a set with a case

# FISHTRON

## RX MINI

[ORDER CODE: RX MINI]

**DIMENSIONS (H x W x D):**  
36 X 71 X 25 mm

**CONNECTABLE DEVICES:**  
9 alarms or alarm sensors

**RANGE UP TO:**  
100m

**POWER SUPPLY:**  
2x AAA batteries

FLAJZAR®

AS SMALL AS IT GETS

# FISHTRON RX MINI

This receiver stands out for its small size and simplicity.

The miniature RX MINI receiver allows you to receive up to nine of our devices. The bite is signalled acoustically and visually on the LED display. Simple, easy to carry and with long battery life.

// Attractive transparent design

// 9 channels for receiving Q10 TX, Q9-RGB TX, e3 TX and CATFISH TX3 bite alarms and ALF3 and ALF4 alarms

// Acoustic bite signalling

// Memory LED

// Power supply with only two AAA cells

// Range up to 100m in open space

// Battery life up to 20 days  
NONSTOP

PREDATORS

[ORDER CODE: CATFISH TX3]

DIMENSIONS (H x W x D):  
62 X 27 X 22 mm

SENSITIVITY SETTINGS:  
4 modes

RANGE UP TO:  
100m

POWER SUPPLY:  
1x CR2023 battery

FLAJZAR®

A LITTLE HELPER FOR CATFISH FISHING

# FISHTRON CATFISH TX3

The world's smallest wireless alarm for catfish fishing. It stands out for its small size and mounting to the rod. Fixed mounting directly on the rod allows you to concentrate only on catching the catfish itself, instead of searching for lost bells and shock sensors.

Thanks to the modern 4D system used by the bite alarm, the maximum accuracy of the bite evaluation is achieved. The 4D system does not only evaluate the change of position in the three standard X, Y and Z axes, but also uses the time parameter as the fourth dimension. When fishing for catfish, it is not the vibrations that are evaluated, but the change in angle or bend of the rod.

// Integrated transmitter with audio and optical signalling

// The alarm works with RX MAX, RX MULTI, RX MINI receivers, WRL1, WRL3, WRL4 lamps and HL346P headlamp

// Choice of 5 sensitivity modes

// Range up to 100 m in open space

// Two bases for easy mounting to different rod types

// 4D systém

// Screwdriver for battery replacement included

// Adjustable acoustic alarm

// 20-pulse LED

// Long battery life

// Option to purchase a set with a case

[ORDER CODE: ALF3]

DIMENSIONS (H x W x D):  
96 X 50 X 29 mm

ANGLE OF VIEW:  
110° on both sides

RANGE UP TO:  
250m

POWER SUPPLY:  
2x LR01 batteries

FLAJZAR®

YOUR SAFETY IS OUR PRIORITY

# FISHTRON

## ALF3

PIR motion alarm sensor is designed primarily to monitor the fishing spot. It features modern double-sided motion detection providing a wide angle of view. Wireless range of the integrated transmitter is in the 100 m.

In addition to guarding the fishing spot and rods, this device finds use, for example, for guarding a boat, car, motorcycle or tent - in short, wherever you want to have control over your property when wandering by the water.

// Double sided motion detection with 110° angle of view on each side

// Coverage distance up to 6 m

// Alarm sensor works with RX MAX, RX MULTI, RX MINI receivers, WRL1, WRL3, WRL4 lamps and HL346P headlamp

// When connected to RX MULTI and RX MAX, the alarm volume can

be controlled

// Minimal battery consumption

// Waterproof

// The sensor is equipped with an internal free moving shock sensor with digital analysis

// Screw length 20 mm

[ORDER CODE: ALF4]

DIMENSIONS (H x W x D):  
56 x 101 x 28 mm

ANGLE OF VIEW:  
130° on each side

RANGE UP TO:  
500 m depending on  
the chosen receiver

POWER SUPPLY:  
3V (2x AAA batteries)

BOLT LENGTH:  
25mm

NEW  
GENERATION

FLAJZAR®

NUMBER ONE IN SAFETY FOR YOUR EQUIPMENT

# FISHTRON

## ALF4

Our ALF4 alarm sensor has also received new proportions. A novel design that is part of the entire new product line.

The possibility of setting the sound and optical signalling directly on the alarm or only on the receiver. Three adjustable sensitivity combinations guarantee high quality protection of both the fishing spot and the boat or rod rack directly on the water.

Three guarding modes:

- 1. Mode** motion detection range up to 6 m without shock detection
- 2. Mode** motion detection range up to 3 m without shock detection
- 3. Mode** motion detection range up to 3 m including shock detection

// The alarm sensor contains a shock sensor and two optical infrared (PIR) sensors that detect movement of people

// Double-sided motion detection with 130° angle of view on each side

// Coverage distance of the guarded area up to 6 m

// Alarm sensor works with RX MAX,

RX MULTI, RX MINI receivers, WRL1, WRL3, WRL4 lamps and HL346P headlamp

// When connected to RX MAX and RX MULTI receivers, the alarm volume can be controlled

// Minimal battery consumption

// Waterproof

FLAJZAR®

MINIATURE ELECTRONIC SIGNALLING DEVICE

# FLAJZAR FEEDER 4

FOR NIGHT FEEDER FISHING

With our electronic feeder you can recognize a bite in the twilight and at night.

The indicator is designed to be placed on the tip of the feeder rod and the bite is indicated by a flashing LED. Thanks to advanced electronics, the indicator can be set in three sensitivity levels for the most accurate signal in any conditions.

// Easy to use

// Weight 2,5 g

// 2 pcs 3V long life batteries

// USB charger

// Waterproof

// Red position LED and green bite LED

// Precise attachment to the rod by either our unique conical mount or by rubber bands

FLAJZAR®

AUTOMATIC LIGHTING AFTER A BITE

# WRL1 WIRELESS LAMP

Practical small LED lamp with automatic light-up function after a bite. This device will be especially welcomed by anglers at night and on short trips where you need as few things as possible. It is very compact.

The lamp contains intelligent electronics developed and manufactured by FLAJZAR s.r.o. and tested in laboratories in the Czech Republic. The hunting spot or bivvy is always automatically illuminated immediately after a bite. The lamp can be controlled remotely with RX MAX, RX Multi or WRL Key.

// Easy to operate

// The lamp can be used in the normal way or in bite signal mode

// After approx. 30s after the bite in a signalling mode it goes off by itself after 30s

// Power: 3 x LR3 (AAA) batteries - (included)

// Number of white LEDs: 3

// The lamp can be paired with Q10 TX, Q9-RGB TX, e3 TX, CATFISH TX3, RX MAX, RX MULTI receivers and ALF3 and ALF4 alarm sensors

// Number of memory slots (maximum number of simultaneously learned devices): 8

// Up to 150 m control distance

**[ORDER CODE: WRL4]**

**DIMENSIONS (H x W x D):**  
245 X 41 X 41 mm

**MEMORY SLOTS:**  
8

**CONTROL DISTANCE:**  
up to 700m

**POWER SUPPLY:**  
Li-Ion 5000 mAh

FLAJZAR®

MULTIFUNCTIONAL RGB LED LAMP WITH A RECEIVER

# WRL4 WIRELESS LAMP

Multifunctional RGB LED lamp is designed not only for normal lighting, but thanks to the integrated receiver it can be automatically lit after a bite with a colour of your bite alarm or white colour. Of course it will also light up after an alarm signal from fishing alarm.

The lamp has a 2 strong neodymium magnet with a counterpart, which guarantees the placement of the lamp anywhere on your bivvy. The waterproof construction, adjustable brightness, insect repellent or emergency SOS light also predestines the lamp for use on the boat when tying up lures and baits. The lamp can be controlled by the lamp button on the RX MULTI and RX MAX receiver or the WRL-KEY keychain.

// 7 colours

// 2 light modes (colour, white)

// Simple operation with two buttons on thr sides

// 4-step light control

// LED power: up to 550 Lm

// Charging: 5V / max 700mA  
(charging time approx. 5 hours)

// Standby time up to 30 days

[ORDER CODE: COB]

LIGHT COLOR:  
white and red

NUMBER OF MODES:  
5

LED POWER:  
up to 200 Lm

POWER SUPPLY:  
1200 mAh accumulator

FLAJZAR®

RECHARGEABLE HEADLAMP WITH ADJUSTABLE LIGHT

# HEADLAMP

Powerful headlamp with white and red LED for recharging. This headlamp will never leave you in the dark. It has one rechargeable battery and one spare batteries attachment.

Whenever the rechargeable battery runs out you can easily swap out the attachments and continue to light on three AAA batteries. The strong adjustable strap and the light weight of the headlamp guarantee a good hold on your head.

// Up to 200 lumens for white light and adjustable intensity (low/high)

// Luminous intensity up to 100 lumens for red light and intensity adjustment (low/high)

// Battery life 4 hours on with high intensity and 24 hours with low intensity

// Range up to 150 m for white light

// 1200mAh rechargeable battery (USB cable included)

// Headlamp power options - rechargeable battery (included) / 3xAAA batteries - not included

// Headlamp tilt function up to 90 degree angle

// SOS function

// IPx4 waterproof standard

// Adjustable strap, lightweight and durable body

**[ORDER CODE: HL346]**

**POWER SUPPLY:**  
1800mAh Li-pol accumulator

**NUMBER OF MODES:**  
4

**LED POWER:**  
up to 200 Lm

**RANGE:**  
up to 100 m

IP66 - completely dustproof  
and protection against  
intense water spray

FLAJZAR®

WIRELESS LED HEADLAMP WITH GREEN LIGHT

# HL346 HEADLAMP

The HL346 headlamp is a unique rechargeable LED headlamp with a powerful battery, a choice of two white and two green light sources, a Zoom function (widening and narrowing of the light stream) and also the possibility to activate the Sensor by Hand Moving function (touchless control).

The headlamp has several key advantages - long battery life, light weight and fast charging. The battery status is indicated by blue LEDs on the front of the headlamp.

The headlamp also has a quality strap that guarantees a good hold on the head. Of course, the IP rating is sufficient for using the headlamp in nature.

1. white LED 100% - up to 3 hours of NONSTOP light

2. white LED 50% - up to 6 hours of NONSTOP light

3. red LED 100% - up to 11 hours of NONSTOP light

4. red LED 50% - up to 19 hours of NONSTOP light

**[PRODUCT CODE: HL346P]**

**POWER SUPPLY:**  
built-in Li-pol battery 3.7V/1800 mAh

The headlamp can be paired with Q10 TX, Q9-RGB TX, e3 TX, CATFISH TX3 and ALF3 and ALF4 alarm sensor

**NUMBER OF MODES:**  
4

**LED POWER:**  
up to 260 lm

**RANGE:**  
up to 150m

IP 66 - completely dustproof and protection against intense water spray

FLAJZAR®

WIRELESS LED HEADLAMP WITH GREEN LIGHT

# HL346 HEADLAMP WITH RECEIVER

The HL346P headlamp with receiver is a rechargeable LED headlamp with a powerful battery, the option to choose from two white and two green light sources, Zoom function (expanding and narrowing the light stream) and also the option to turn on the Sensor by Hand Moving function (non-contact control). The headlamp has several key advantages - long battery life, light weight and fast recharging. The battery status is indicated by blue LEDs on the front of the headlamp.

The headlamp is designed not only for normal lightning, but thanks to the integrated receiver it can be automatically illuminated after a bite. Up to 8 devices can be stored simultaneously in the headlamps memory. Therefore, it lights up not only for a fish bite based on the signal sent from the bite alarm, but also the alarm signal sent from the ALF3 or ALF4 alarm sensor.

1. white LED 100% - up to 3 hours of NONSTOP light

3. red LED 100% - up to 11 hours of NONSTOP light

2. white LED 50% - up to 6 hours of NONSTOP light

4. red LED 50% - up to 19 hours of NONSTOP light

# MAGNETIC QUICK RELEASE CONNECTOR

The magnetic quick release connector is a great tool for every angler who uses bite alarms. Once you set up the quick connector on your stand or fork, you don't need to adjust it anymore.

The magnetic quick release connector is made of aluminium and has a great black elox finish. The universal fishing threads ensure that the quick release connector will be compatible with most forks, stands and signals manufactured worldwide. Two strong neodymium magnets and perfect workmanship will ensure a solid connection between the bite alarm and the stand. The quick release connector can be purchased either in a pack of one or two in a convenient package. We also offer only the bottom part of the quick release connector, which you can use in case you already own our connectors, but at the same time you use several stands or forks that you don't want to choose between without further screwing.

Option to buy a magnetic quick release connector or only the lower part
